

# CODECRAFT ACADEMY

## Admission, Facilities & Student Services — 2026

### Admission Process

1. Submit the course enquiry form. 2. Attend counselling or entry assessment where applicable. 3. Select the course and batch. 4. Submit documents. 5. Pay registration and first installment. 6. Receive admission confirmation and student portal credentials.

### Required Documents

Recent passport-size photograph, government-issued identity document, previous qualification marksheet or certificate, and active contact details.

### Scholarship

Merit-based tuition concessions are available subject to academy scholarship rules. Contact the admissions desk for current eligibility.

### Computer Lab

The academy provides computer lab access with development tools required for Python, web development and data science coursework.

### Project Mentoring

Every major course includes a guided project with project reviews, Git-based submission guidance and basic deployment support.

### Placement Support

Resume workshops, mock interviews, GitHub profile guidance and interview preparation are provided. Placement support does not guarantee employment.

### Online Learning

Recorded revision material and selected course resources are available through the student portal for enrolled students.
